**PRODUCT OVERVIEW**

**DUALFIX 0+ & 1**

**0 to 18 kg**

- Group Body weight

**EASY ACCESS FUNCTION**

- The DUALFIX 360° seat rotation makes it easier to get your child into or out of the child seat (Easy Access Function).

When used in rearward facing mode:

1. Grasp the recline button and put the child seat into the most reclined position.
2. Press the grey rotation button and turn the seat 90° into the Easy Access position.

When used in forward facing mode:

1. Grasp the recline button and put the child seat into the most upright position.
2. Press the grey rotation button and turn the seat 90° into the Easy Access position.

**CAUTION!** Before every journey: make sure that the rotating part of the child seat is fully engaged by trying to turn the seat around in both directions.

**USE IN THE VEHICLE**

- Please observe the instructions on the use of child restraint systems described in your vehicle owner’s manual.
- The seat may be used in all vehicles equipped with the ISOFIX anchoring systems. Please consult your vehicle owner’s main for information the seats which are approved for child safety seats in the weight class 0-18 kg.
- The fastening with ISOFIX and support leg is based on semi-universal approval. The seat may be used only in those vehicles cited in the enclosed vehicle type list. This type list is constantly updated. The latest version can be obtained from us or from www.britax.eu / www.roemer.eu.
- You can use your child car seat as follows:
- **Step 1**
  1. Grasp the recline button and move the seat shell downwards into the upright position.

**CARE AND MAINTENANCE**

- To ensure the full protective effect of the child safety seat:
  - In the event of an accident with an impact speed above 10 km/h it is possible that the child safety seat may have been damaged, but that the damage may not be immediately obvious. In this case the child safety seat must be replaced. Please dispose of it properly.
  - Regularly check all important parts for damage. Make sure that the mechanical components in particular are all in perfect working order.
  - To prevent damage, ensure that the child safety seat does not become jammed between hard objects (car door, seat runners etc.).
  - Always have the child safety seat checked if it has been damaged (e.g. if it is dropped).
  - Please recycle or dispose of the old seat.
  - To protect your child, it is imperative that you install and use the DUALFIX exactly as described in this manual.

Please observe the waste disposal regulations in your country.
Take the time to carefully read through these instructions, and always keep them ready to hand in the designated pocket on the child seat.

For the protection of all vehicle occupants:
- In the case of an emergency stop or an accident, persons or objects which are not properly secured in the car can cause injury to other vehicle occupants. For this reason, please always check that:
  - the backrests of the vehicle seats are locked (e.g. that the latch on a folding rear seat bench is engaged).
  - heavy or sharp-edged objects in the vehicle (e.g. on the parcel shelf) are secured.
  - all persons in the vehicle have seatbelts fastened.
  - the child safety seat is always secured in the car via the ISOFIX anchoring, even when there is no child in the seat.
- The shoulder straps should be positioned as low as possible over the child’s shoulders or slightly above.
- All persons in the vehicle have their seatbelts fastened.
- The shoulder straps should be positioned as low as possible over the child’s shoulders or slightly above.
- The child seat is engaged on both sides with the ISOFIX locking arms.
- The child seat is securely fastened.
- The harness is only correctly engaged if both of the ISOFIX indicators are completely green.
- All persons in the vehicle have seatbelts fastened.
- Only allow your child to enter and exit the vehicle on the pavement side.
- Make stops during longer journeys to give your child an opportunity to run about and play.

To protect your vehicle:
Some vehicle seat coverings made of more delicate materials (e.g. velour, leather, etc.) may develop wear marks when child seats are used. For optimum protection of your seat covers, we recommend using the BRITAX RÖMER Car Seat Protector, which is available from our range of accessories.

**INSTALLATION**

**Preparatory work**

1. If your vehicle is not equipped with the ISOFIX insert guides as standard, clip the two insert guides which are included with the seat to the cut-out of the seat base and insert them into the two ISOFIX attachment points of your vehicle.

TIP: The ISOFIX attachment points are located between the surface of the seat base and the backrest of the vehicle seat.

2. Move the head restraint on the vehicle seat to the upper position.

**For the protection of your child:**
- Move the front seat forward far enough that your child’s feet cannot hit the backrest of the front seat (to prevent risk of injury).
- The child safety seat can get hot in direct sunshine. Caution: Children’s skin is delicate and could be injured as a result. Protect the child seat against intensive direct sunlight when it is not currently in use.
- All safety belts must be adjusted properly.
- Any problems which occur are usually caused by dirt or foreign objects on the insert guidance points and prevent damage to the seat covering. When not in use, they should be pushed back into the seat base. The insert guidance points must be removed before the backrest is folded down.
- Never allow your child to enter the vehicle on the door sill.
- Please do not ever leave your child unattended in the child safety seat in the vehicle.

**SECURING YOUR CHILD**

A correctly adjusted headrest ensures optimal protection for your child in the safety seat. The headrest must be adjusted so that the shoulder straps are at the same level as your child’s shoulders or slightly above.

1. Grasp the recline button and push the seat into the most upright position.

2. Press the grey rotation button and turn the seat forward facing.

3. Pull the grey fabric loop to pull both shoulder straps downwards.

4. Pull the adjustment strap to the front.

5. Press the grey rotation button to change from rearward facing to forward facing. For younger children from 0-6 months, use the seat in its most recline position with the infant insert to ensure your child’s spine is supported whilst sleeping.

6. Make sure that your child is always securely fastened.

For the safety of your child, before every journey in the car check that:
- the child seat is engaged on both sides with the ISOFIX locking arms.
- the child seat is securely fastened;
- the support leg is firmly on the vehicle floor and the support leg indicator is green;
- the child seat ISOFIX indicators are completely green;
- the shoulder straps are correctly adjusted and the straps are not twisted;
- the shoulder pads are in the right position on your child’s body;
- the adjuster buttons are engaged in the harness buckles.
- the harness is only correctly engaged if both of the ISOFIX indicators are completely green.
- all persons in the vehicle have seatbelts fastened.
- Use on the rear seat:
- Move the front seat forward far enough that your child’s feet cannot hit the backrest of the front seat (to prevent risk of injury).
- The child safety seat can get hot in direct sunshine. Caution: Children’s skin is delicate and could be injured as a result. Protect the child seat against intensive direct sunlight when it is not currently in use.
- All safety belts must be adjusted properly.
- Any problems which occur are usually caused by dirt or foreign objects on the insert guidance points and prevent damage to the seat covering. When not in use, they should be pushed back into the seat base. The insert guidance points must be removed before the backrest is folded down.
- Never allow your child to enter the vehicle on the door sill.
- Please do not ever leave your child unattended in the child safety seat in the vehicle.

Removing the child seat with ISOFIX:

1. Pull both adjustment buttons and slide the lower section of the support leg into the upper section until it is fully stored.

2. Push the green ISOFIX indicator and the red release button on the two locking arms towards each other.

3. Slide the ISOFIX locking arms back into the seat shell.

4. A rattling noise is produced when the locking arms are pushed back in.

5. Tip: The locking arms are protected against damage when they are pushed back into the seat base.

CAUTION: Remove the child safety seat from the vehicle. The child safety seat must never be transported in the car if it is not properly secured.

**SECURING THE CHILD SAFETY SEAT**

1. Pull the grey fabric loop to pull both shoulder straps downwards.

2. Place the child seat in the direction of travel rearward-facing on the vehicle seat.

3. Grasp the child seat with both hands and slide the two locking arms firmly into the insert guides until the locking arms engage with a clicking noise on both sides. The green ISOFIX indicators must now be visible on both sides.

CAUTION: The locking arms are only correctly engaged if both of the ISOFIX indicators are completely green.

4. Push the child seat with a substantial amount of force as far back as it will go.

5. Pull both adjustment buttons and pull out the support leg until it rests firmly on the floor of the vehicle.

6. Make stops during longer journeys to give your child an opportunity to run about and play.
